

# X5

## FLEXI HOPPER

Just something different  
in the market

FLEXI-HOPPER

# FLEXI HOPPER

Five different possible functions

Easy conversion and implementation

## X5 Pay-Out

Hopper suitable for any kind of coin-set or token.

## X5 EVO

Its main feature is that it inductively and optically differentiates between outgoing coins, thus automatically finding the correct change from coins of different values.

## X5 DPO – Dynamic Pay-Out

Quick and dynamic payout with cash kept in a currency box, ready for use. Coins are issued in three different configurations and positions.

## X5 In Out

Easy cash-flow management both for coin insertion and change giving operations. CC-Talk interface for coin handling available, with different typologies and perfectly adaptable. Money handling is electronically controlled, which fits well with change giving machines, automatic cash machines and slot machines.

## X5 CCS – Coins Counter and Sorter

Coin counting and sorting function. Original size and functionality allows for coin counting and sorting in four different outputs. Suitable for coin-recycling devices.

## TOP FLEXIBILITY

Easily adaptable to various applications. Comes in small, convenient size. Appealing and practical use, adjustable in various configurations. Adapts to any type of coins or tokens with its special belts: up to 40mm in diameter and 6.5mm wide, and 16mm in diameter and 1.5mm wide (minimum values).

## SAFETY

Double integrated optic sensors for coin output, with anti-counterfeit functionality for any currency, including coins with a central hole. Highly protected access to cash loading, with lock tight lid. Extra anti-theft lock available.

## RELIABILITY

Belt driven coin extraction ensures long lasting quality for cash handling. "Coin shaking" function prevents gaps and coin jams.

## EASY CONFIGURATION

The electronic management system of the CPU is upgradable from outside without having to disassemble the device. Front or back USB version also available. Handy connection and eye-catching design.

## SPEED

Quick Pay-Out (over 4 coins in a second). Cash output can be easily performed in two different positions, at the front or on the side: multiple or single coin-sets can be dispensed (any currency with coins up to 40mm). Belt driven coin extraction ensures enhanced reliability over time.

## CAPACITY

Excellent capacity, up to 1,500 1 Euro coins, upgradable with expansion sets provided. Coin tubes can be located at a high level for maximum integration and easy assembly for any type of machine with cash handling and change provision features.
